

What if we could leave our children a cleaner planet?

What if we could clean up the mess we've already made?

What if we could do it now?

Clean-ALL

Clean-ALL is non-toxic, environmentally friendly, and people safe product. It penetrates fat, oil, grease and dirt and breaks them down into completely biodegraded, environmentally friendly materials.

How is Clean-ALL Made?

When the basic ingredients are blended at specific time intervals, temperature, and sequence, they lose their former characteristics and a new substance is created described as "colloidal micelles". Colloidal micelles are so small – about the size of 10 hydrogen atoms - they can only be observed with the most powerful microscopes.

What Does This Mean?

It means that the particles are so small, they can fit into spaces most cleaners can't. They attract solid particles and hold onto them allowing fats, oils and greases to be permanently dissolved in water. The result is material that has been biodegraded into soil components.

Available Sizes → 710ML Spray Bottle; 4L Jug; 20L Pail; and 208L Drums

What Can Clean-ALL Be Used For?

Clean-ALL has a wide range of applications in a number of settings. Clean-All may be used as a:

Cleaner 🌍 Degreaser 🌍 Coolant 🌍 Lubricant
Deodorizer 🌍 Biodegrading Agent
Bioremediation 🌍 Water Treatment

Who Uses Clean-ALL?

Clean-ALL is an effective product for industries, including, but not limited to:

Automotive 🌍 Energy 🌍 Oil & Gas 🌍 Aviation
Marine 🌍 Food Services 🌍 Transportation
Environmental Services

What is in Clean-ALL?

Clean-ALL is formulated through a proprietary process that combines a variety of natural, renewable products and extracts.

The basic formula is protected as a trade secret, however a list of the products and chemical families is listed below (in no particular order):

Carrot	Soy Bean Oil
Corn Oil	Tallow
Glycerin	Vanillin
Guar Gum	Vegetable-Based Fatty Acids
Onion Extract	Water
Orange Extract	

Clean-ALL is

Environmentally Friendly 🌍 Biodegradable 🌍 Anti-Bacterial
Non-Toxic 🌍 Non-Caustic 🌍 Non-Combustible
Phosphate-Free 🌍 Nitrate-Free 🌍 Pollutant-Free

NOTE: Please avoid using Clean-ALL on poor quality pure aluminum
